_____

PROFESSIONAL SUMMARY

- ❖ 5 years of comprehensive expertise in *front-end* and *back-end web and mobile development* engaging with partnered clients from diverse industries such as insurance, medical, and I.T.
- ❖ Well-versed on the entire *Software Development Lifecycle*, having successfully completed multiple projects from inception through deployment and maintenance.
- ❖ Leadership capabilities having been able to lead a team of full-stack developers in a *Senior Developer* role in a previously completed project.
- ❖ Above-average proficiency in developing websites and applications usable across various platforms, incorporating up-to-date development technologies and libraries, primarily focused on *Azure, Apache, MySQL, MongoDB, PostgreSQL, Docker, JavaScript, ExpressJs, NodeJs, ReactJs, and React Native*.
- ❖ Advanced proficiency in *Restless & Serverless API Integration, Microservices, CI/CD, AWS Lambda, EC2, S3 bucket, in Ubuntu* server and version control using *Git & Github.*
- ❖ Adhering to industry-leading practices and coding standards, proficient in following design standards, such as *MVC Design Architectures*, within an *Agile/Scrum framework* using *Atlassian Jira.*

PROFESSIONAL SUMMARY

Highly Succeed Inc. - Full Stack Developer   *May 2022 – January 2024*

- Effectively engineered and launched a diverse array of applications from inception to implementation, ensuring their ongoing maintenance and optimization, which includes a teleconsultation platform for medical practitioners.
- Built the client's application platform's different features' user interface in the frontend and optimized its API endpoints in the backend throughout a series of iterations.
- Performed root cause analysis to understand and eliminate certain errors as the new features are continuously integrated into the whole application platform.
- Closely collaborated with a team of developers in implementing the different stages of the projects demonstrated leadership capabilities by steering team efforts towards successful delivery and completion of the project requirements.
- Effectively translated into code base the specific requirements according to the actual use cases of the application's stakeholders and end-users, through having been able to pass the set unit tests and user-acceptance tests criteria.
- Skillfully transformed the precise requirements outlined by application stakeholders and end-users into robust codebase, meticulously meeting the criteria set by both unit tests and user-acceptance tests.

I.T. Matters - Web Developer   *April 2017 – May 2022*

- Developed several responsive websites using NodeJs, ReactJs, CSS, HTML and implemented databases in MySQL, MongoDB, PostgreSQL, and Firebase including an online voting platform, Invoice generator application, and an e-commerce platform.
- Assigned in maintaining & debugging errors in the applications the firm has developed.
- Implemented a various combination of design, technology, and programming codes to improve the application and website's general appearance and performance.

EDUCATION

Asian Development Foundation College - B.S. Business Administration   *June 2015 – April 2020*
